

SharesVault is launched

Unlisted companies' equity trades platform – SharesVault launched on December 10, 2012. It's first of its kind platform in India.

SharesVault is an online platform for fast growing unlisted companies and potential investors looking to invest in quality non IPO enterprises with growing sales and profits. Registered investors on SharesVault platform can buy/sell shares of companies registered on SharesVault. Companies which are looking for funds for their expansion can get funds through SharesVault just by diluting minimal stake. SharesVault is a bridge between Companies seeking fund and investors searching a good investment opportunity. SharesVault is a boon for HNIs like business owners, doctors, lawyers, builders etc, Institutional Investors and Private Equity Funds. SharesVault also provides facility of big equity deals, debt financing and M&A activities. SharesVault is first private venture backed enterprise in India.

Idea founded way back in 2010 but it took two years to crystallize it. After through research on legality of product and heavy brainstorming to fill gaps and loopholes, SharesVault is here to cater investor communities with new investment option and for companies a new way to raise capital. Founders are aggressively hoping for the success of this product.

SharesVault are in talks with many companies and hoping to see first company registration soon.
